Regulation of clotting cascade
Coagulation pathway
regulation of coagulation
blood coagulation
regulation of hemostasis
regulation of blood coagulation
positive regulation of hemostasis
positive regulation of blood coagulation
positive regulation of coagulation
regulation of body fluid levels
HIF−1−alpha transcription factor network
blood vessel development
blood vessel morphogenesis
vasculature development
tube morphogenesis
tube development
positive regulation of vascular endothelial growth factor signaling pathway
regulation of protein maturation
regulation of protein processing
protein localization to cell periphery
endocytosis
regulation of pinocytosis
regulation of potassium ion transmembrane transport
regulation of ventricular cardiac muscle cell action potential
plasma membrane organization
regulation of monoatomic cation transmembrane transport
regulation of monoatomic cation transport
regulation of metal ion transport
positive regulation of monoatomic cation transmembrane transport
positive regulation of cation transmembrane transport
positive regulation of transmembrane transport
negative regulation of protein metabolic process
nucleoside catabolic process
ribonucleoside catabolic process
carbohydrate derivative catabolic process
purine nucleoside salvage
regulation of cell adhesion mediated by integrin
p73 transcription factor network
Collagen chain trimerization
Syndecan−1−mediated signaling events
Assembly of collagen fibrils and other multimeric structures
Collagen biosynthesis and modifying enzymes
Collagen formation
Integrin signaling pathway
Beta1 integrin cell surface interactions
Extracellular matrix organization
collagen biosynthetic process
collagen metabolic process
wound healing, spreading of epidermal cells
wound healing
Validated transcriptional targets of deltaNp63 isoforms
extracellular matrix organization
external encapsulating structure organization
extracellular structure organization
Beta3 integrin cell surface interactions
Elastic fibre formation
positive regulation of reactive oxygen species biosynthetic process
positive regulation of myoblast fusion
