

Gene sets from Human_GOBP_AllPathways_filtered_500orLessV2.gmt

B: Blood vessel morphogenesis
(GO:0048514, n = 240)

A: Coagulation pathway
(Reactome, n = 57)

shared (A ∩ B): ITGA2B, ITGB3, SERPINE1

Jaccard coefficient

$$J = \frac{|A \cap B|}{|A \cup B|} = \frac{3}{294} = 0.01$$

Overlap coefficient

$$\frac{|A \cap B|}{\min(|A|, |B|)} = \frac{3}{57} = 0.05$$

Largely unrelated sets: only 3 genes in common, so both coefficients are low.
